

# Meet Your Local Lifesaver!

You may have spotted a new arrival in your community, a bright red life-saver! As part of the StreetBeat campaign, a publicly accessible Automated External Defibrillator (AED) has been installed nearby, ready to help in case of a sudden cardiac arrest.

Sadly, 26,000 Australians suffer out-of-hospital sudden cardiac arrests every year, and only 1 in 10 survive. But together, we can change that by making sure these AEDs are ready to help 24/7, rain, hail or shine.

Here's where you come in:  
We'd love you to become an AED Champion. It's simple! Just check in on your local AED once a week, like you would check in on a good friend.

- ✓ Have a quick look at it
- ✓ Is there any visible damage?
- ✓ Is the 'Rescue Ready' light (top right of the orange container) glowing green?

If everything looks good, carry on knowing your community is safer! If something's wrong, call St John Ambulance at 1300 ST JOHN, they'll handle it.

Your quick check-ins help save lives.

Thank you for being an AED Champion!
